### From “broken” investment case to profitable growth company

**Topic:** APONTIS communicated the launch of Single-Pill finder (*discussed here*) and announced **market introduction of Rosazimib**, a Single Pill combining Rosuvastatin and Ezetimibe with an estimated peak sales potential of € 3m.

Worth highlighting, the development of Single-Pill finder was conducted with close participation of more than 400 physicians, which **should ensure its strong acceptance and practicability in clinical setting**.

With the launch of Rosazimib, **APONTIS extends its portfolio to 11 Single Pills** with at least two more to be launched this year. Management estimates the **total combined peak sales potential of the three Single Pills at € 8-11m**, reflecting a rather conservative market share assumption. In 2024E, **APONTIS looks set to add another five Single Pills to its portfolio** – two in Q1 and three in Q3-Q4 – with a combined peak sales estimate of € 18-21m.

With that, following a string of disappointments on the back of two tenders and supply chain constraints for Atorimib, **APONTIS is nearing its primetime with sustainable dynamic Single Pills growth and inflecting EBITDA towards € 10m by 2025E**, corresponding to 4x EBITDA or 7x EBIT. Backed by rapidly expanding Single Pills portfolio, this should only be a stepping stone, as increasing adoption rates should continue driving scalable growth over the mid-term.

Consequently, the market perception of the company looks set to shift away from a “broken” investment case to a profitable growth company, **driving a substantial re-rating of the share price**. Indeed, the market continues to price APONTIS as a broken investment case, despite **improving visibility on profitable growth ahead**.

**Operational newsflow cycle looks set to turn positive** with a potential outperformance of the “worst case” FY’23 outlook, as CMO for Atorimib is making every effort to ensure greater supply of the product. Aided by Single Pill finder we are reasonably optimistic for the near-term uptake forecasting **40% yoy Single Pill growth for 2024E**, comprising 20% growth with “legacy” pills ex-Atorimib (vs. 2021: +27%; 2022: +23%; 2023E: +24% - ex tenders/outliers), € 6m new Single Pills contribution and € 2m Atorimib “catch up”. This should enable APONTIS to reach an **EBITDA of € 4m in FY’24E** with a clear upward sloping trajectory. **BUY** with **€ 25 PT** based on DCF.

## 1. General Information/Liabilities

This research report has been produced for the information purposes of institutional investors only, and is not in any way a personal recommendation, offer or solicitation to buy or sell the financial instruments mentioned herein. The document is confidential and is made available by Hauck Aufhäuser Lampe Privatbank AG, exclusively to selected recipients [in DE, GB, FR, CH, US, UK, Scandinavia, and Benelux or, in individual cases, also in other countries]. A distribution to private investors in the sense of the German Securities Trading Act (WpHG) is excluded. It is not allowed to pass the research report on to persons other than the intended recipient without the permission of Hauck Aufhäuser Lampe Privatbank AG. Reproduction of this document, in whole or in part, is not permitted without prior permission Hauck Aufhäuser Lampe Privatbank AG. All rights reserved.

Under no circumstances shall Hauck Aufhäuser Lampe Privatbank AG, any of its employees involved in the preparation, have any liability for possible errors or incompleteness of the information included in this research report – neither in relation to indirect or direct nor consequential damages. Liability for damages arising either directly or as a consequence of the use of information, opinions and estimates is also excluded. Past performance of a financial instrument is not necessarily indicative of future performance.

## 2. Responsibilities

This research report was prepared by the research analyst named on the front page (the "Producer"). The Producer is solely responsible for the views and estimates expressed in this report. The report has been prepared independently. The content of the research report was not influenced by the issuer of the analysed financial instrument at any time. It may be possible that parts of the research report were handed out to the issuer for information purposes prior to the publication without any major amendments being made thereafter.

## 3. Organisational Requirements

Hauck Aufhäuser Lampe Privatbank AG took internal organisational and regulative precautions to avoid or accordingly disclose possible conflicts of interest in connection with the preparation and distribution of the research report. All members of Hauck Aufhäuser Lampe Privatbank AG involved in the preparation of the research report are subject to internal compliance regulations. No part of the Producer's compensation is directly or indirectly related to the preparation of this financial analysis. In case a research analyst or a closely related person is confronted with a conflict of interest, the research analyst is restricted from covering this company.

## 4. Information Concerning the Methods of Valuation/Update

The determination of the fair value per share, i.e. the price target, and the resultant rating is done on the basis of the adjusted free cash flow (adj. FCF) method and on the basis of the discounted cash flow – DCF model. Furthermore, a peer group comparison is made.

The adj. FCF method is based on the assumption that investors purchase assets only at a price (enterprise value) at which the operating cash flow return after taxes on this investment exceeds their opportunity costs in the form of a hurdle rate of 7.5%. The operating cash flow is calculated as EBITDA less maintenance capex and taxes.

Within the framework of the DCF approach, the future free cash flows are calculated initially on the basis of a fictitious capital structure of 100% equity, i.e. interest and repayments on debt capital are not factored in initially. The adjustment towards the actual capital structure is done by discounting the calculated free cash flows with the weighted average cost of capital (WACC), which takes into account both the cost of equity capital and the cost of debt. After discounting, the calculated total enterprise value is reduced by the interest-bearing debt capital in order to arrive at the equity value.

Hauck Aufhäuser Lampe Privatbank AG uses the following three-step rating system for the analysed companies:

Buy: Sustainable upside potential of more than 10% within 12 months  
Sell: Sustainable downside potential of more than 10% within 12 months.  
Hold: Upside/downside potential is limited. No immediate catalyst visible.

NB: The ratings of Hauck Aufhäuser Lampe Privatbank AG are not based on a performance that is expected to be "relative" to the market.

The decision on the choice of the financial instruments analysed in this document was solely made by Hauck Aufhäuser Lampe Privatbank AG. The opinions and estimates in this research report are subject to change without notice. It is within the discretion of Hauck Aufhäuser Lampe Privatbank AG whether and when it publishes an update to this research report, but in general updates are created on a regular basis, after 6 months at the latest. A sensitivity analysis is included and published in company's initial studies.
